

Law Enforcement Task	NAME	Learning Objectives
Coordinate intelligence collection (LE)	le01	Know and understand criminal laws, privacy and security issues, applicable to WMD incidents. Recognize interrelationship between information from various sources, collate information, and recognize importance. Be able to share information with other appropriate agencies.
Direct threat assessment (LE)	le02	Be able to assess a situation to determine the dangers and requirements and conduct a vulnerability analysis. Be able to identify criminal elements, capabilities for WMD and likely targets.
Joint, regular training with other agencies (LE)	le03	Conduct training with other agencies to understand assets and sharing capabilities applicable to a WMD incident.
Know and recognize types of agents (LE)	le04	Be able to describe WMD agents, the implications, risks and self-protection levels appropriate to the agents.
Know how and when to operate diagnostic equipment (LE)	le05	Be able to select the appropriate detection equipment, based on the agent and incident, recognize the conditions necessary for operation, recognize the limitations of the equipment, and demonstrate the appropriate use of the equipment and interpretation of the results.
Know self-protection strategies (LE)	le06	Be able to recognize a hazard and select the appropriate PPE to reduce or prevent exposure.
Know when to perform the "hand-off" within the ICS system (LE)	le07	Know how to perform within an ICS system, conditions under which command is to be relinquished.
Maintain certifications and training in compliance with OSHA and other regulations (LE)	le08	Know and understand SOP or certifications related to OSHA and other certifying or training agencies pertaining to WMD events. Obtain instruction and sustain timely knowledge and credentials.
Understand special hazards of a terrorism incident (LE)	le09	Recognize and understand the unusual hazards, problems, and dangers inherent in WMD/terrorist incidents, such as secondary devices, and demonstrate appropriate response to those hazards.

Use reference material to determine appropriate PPE to wear (LE)	le10	Be able to assess situation and refer to HazMat or reference material to determine the appropriate level and use of PPE in an unknown hazard in an emergency situation. Demonstrate the correct selection for deployment of PPE.
Write agency plan for response for different jobs within law enforcement and integrates with plans from other agencies (LE)	le11	Be able to prepare a comprehensive plan for each element of the agency, which also integrates with plans of other related agencies, which provides written guidelines, procedures and protocols for emergency response and coordination during an incident.
Participate in "risk assessment" (LE)	le12	Perform analysis of community and specific target dangers and vulnerabilities. Determine and define vital infrastructures. Recognize and synthesize information related to risk.
Know how to wear and use appropriate level of PPE, in accordance with OSHA standards (LE)	le13	Be able to describe OSHA-compliant PPE, cross-referenced by type of hazard. Demonstrate the appropriate use of PPE.
Know how and when to contain victims	le14	Be able to recognize the appropriate segregation of victims of WMD incidents. Recognize the legal and jurisdictional limitations in securing victims. Recognize levels and options in the segregation of victims and witnesses.
Collect and preserve evidence (LE)	le15	Recognize and apply evidence gathering, maintenance, safeguarding, interpreting, and chain of custody protocols in WMD evidence. Be able to describe the collection and preservation methods.
Conduct special operations in a hazardous environment (LE)	le16	Know and recognize the special dangers and hazards inherent in special operations (SWAT, EOD, etc.) in a hazardous environment of a WMD or potential WMD situation.
Integrate criminal investigation with epidemiological investigation (LE)	le17	Recognize the importance and processes for coordinating investigation techniques with Public Health and Medical Examiner, while establishing areas of responsibility.
Investigate the incident (LE)	le18	Demonstrate ability to gather information and evidence, document the incident and elements of proof necessary for the successful identification and prosecution

		of perpetrators of WMD incidents.
Perform limited mitigation (LE)	le19	Demonstrate understanding of and methods of reducing WMD impact and consequences, regarding property loss, particularly infrastructure, and public safety, based on type of agent, personnel, and equipment availability. Elements include hardening targets, establishment of a perimeter, containment, immediate action, both defensive and offensive.
Perform render/safe procedures (LE)	le20	<i>Bomb Techs Only:</i> Understand and apply the FBI guidelines for render safe. Demonstrate the ability to disarm as suspected WMD improvised device, deactivating, neutralizing, or stabilizing the explosive or agent.
Provide site security (LE)	le21	Recognize site security measures to protect responders, victims, general public, property and equipment, based on special hazards. Maintain ingress and egress control and designate control points to keep area secure.
Recognize a terrorist incident (LE)	le22	Be able to explain and recognize the variables which would suggest a terrorist event or a WMD incident.
Recognize the need to decontaminate people and animals (process and terminology) (LE)	le24	Understand types of suspected WMD agents, signs and symptoms, and need for on-site gross decontamination.
Search for additional devices (LE)	le25	Be aware of potential for secondary WMD devices. Ability to recognize, detect, and isolate the devices.
